Fax : +33 413 55 10 60

Education : **2003** : Habilitation diploma – « A novel approach of the impact of organic compounds towards the oxidizing capacity of the atmosphere: multiphase interactions » - Director : Henri Wortham - University of Provence / **1997** : Ph-D in Sciences – Chemistry of the atmospheric pollution and physics of the environment – « Tropospheric reactivity of oxygenated organic compounds in the aqueous phase: experimental study and model » - Director : Patrick Carlier - University Paris 7 - Denis Diderot / **1993** : Master in Sciences - Chemistry of the atmospheric pollution and physics of the environment - University Grenoble 1 - Joseph Fourier / **1993** : Engineering Diploma of the “Ecole Nationale Supérieure d’Electrochimie et d’Electrométallurgie de Grenoble” (ENSEEG) at the National Polytechnic Institut of Grenoble (INPG).

Professional experience: **2011** : Full Professor in Atmospheric Chemistry at the Chemistry Department of the Aix-Marseille University / **1999** : Assistant Professor at the environmental department of the University of Provence – Marseille

Research Interest – Synopsis: A. Monod was hired in 1998 at the University of Provence to create a new group at the laboratory of environmental chemistry to develop research activities on atmospheric chemistry. A. Monod is now the head of the group that is composed of 5 permanent researchers, 3 engineers and a dozen of PhD and post-doc, whose activities are dedicated to multiphase and heterogeneous processes of organic compounds in the atmosphere including both field measurements and laboratory photochemical reactivity studies. A. Monod has been the principal investigator of 13 national and international projects. Her recent studies have shown that aqueous phase photochemical reactivity of organic compounds lead to the formation of macromolecules that can be a significant source of secondary organic aerosol in the atmosphere. Her work on multiphase and heterogeneous photochemistry of organic compounds has provided 53 peer-reviewed articles and 117 communications at conferences and 16 invited conferences.

Awards and fellowships: **2013:** CIRES (Cooperative Institute for Research In Environmental Sciences) fellowship as visiting professor at the university of Colorado, Boulder / **2013:** CRCT from the Aix-Marseille University / **2002-2005:** CNRS “délégation” research fellowship at Laboratory of Environmental Chemistry of the University of Provence / **1997-1998:** French foreign ministry Lavoisier fellowship for a one year post-doctoral work in the group of Professor F.S. Rowland, University of California, Irvine / **1996-1997:** University scholarship for one year research and teaching at the chemistry department of the University Paris 7 - Denis Diderot / **summer 1992:** Research Fellowship for undergraduate research training in the group of Professor F.S. Rowland, University of California, Irvine.

Synergistic Activities and Services (selected): **Since 2018:** head of the group “instrumentation and reactivity in the Atmosphere / **2016 – 2021:** Member (nominated) of the national scientific council of CNRS / **since 2011:** organizer of seminars at LCE / **2011-2018:** member 7 scientific committees for the recruitment of researchers

Collaborations during the last four years (selected):

1. National collaborations (France): Dr. Roland Thissen, and Pr. Didier Voisin (University Joseph Fourier at Grenoble); Dr. Anne-Marie Delort, Dr. Nadine Chaumerliac and Dr. Laurent Deguillaume (University Blaise Pascal at Clermont Ferrand); Pr. Jean-François Doussin, Dr Paola Formenti and Pr. Bénédicte Picquet-Varraut (University of Paris 12); Dr. Maud Leriche (University Paul Sabatier at Toulouse).

2. International collaborations : Pr. Veronica Vaida (University Cocolrado, USA) ; Pr. Pierre Herckes (Arizona State University); Pr. Hartmut Herrmann (IFT, Leipzig, Germany) ; Dr. Barbara Ervens (NOAA, USA); Dr. Chiara Giorio (University Padova, Italy)
