Receive feedback from a colleague with confidence. Markup Assist displays a task pane in real time so you know exactly how your colleague wants you to fix a drawing. To approve changes from your coworker, simply choose "Approve" from the task pane or click the green arrow. Arranging drawings and parts in a hierarchy. Arrange your designs and parts using a graphical hierarchy that shows what's related to what. This allows you to build an assembly automatically. (video: 1:20 min.) Add your own user attributes to drawings, files, and drawings linked to a file. User attributes are stored and used in the registry. They can be accessed by a user in the same manner as system attributes. Incorporate files from other computers. Link your own files from other computers to AutoCAD or Autodesk Inventor. (video: 1:10 min.) Work with the 2D bar codes that are generated when working with AutoCAD and other software. They can be used for various purposes, including communicating with you via e-mail. (video: 1:30 min.) Rapidly generate 2D bar codes in AutoCAD. Bar code data can be passed as a data element from a drawing to another drawing, report, or table. Use a command or script to create bar codes or edit existing ones. (video: 2:05 min.) Quickly prepare a measurement on-screen. A command can be used to quickly create a measurement on a drawing. (video: 1:25 min.) Install the new version of AutoCAD at any time. Simply click the "Next" button when prompted for a new version and AutoCAD will install automatically. You can then select the "Reload" option to load any version of AutoCAD you previously installed. (video: 1:35 min.) Compatibility fixes: Fix missing coordinate labels when you export an AutoCAD drawing as a shapefile. Fix an issue where you couldn't delete a feature with an extruded offset. Fix issues with coordinate surfaces, including fixes related to export and import. Improve compatibility with Autodesk Inventor. Improve compatibility with programs that use VBA. Improve performance when you create 3D models. Fix some Windows
